

BIG-EZ™ UNIVERSAL / POE DYE INJECTION KIT & CARTRIDGES

Spectroline® leak detection dyes

SPECTROLINE®
HVAC/R

- Works in all systems, including high-pressure R-410A systems!
- Cost effective for medium to large size systems
- No pouring, no refrigerant, no spills — Prefilled Big-EZ™ cartridges are clearly labeled with 32 calibrations so you'll introduce exactly the right amount of dye every time!
- Check valve prevents the backflow of dye or refrigerant and allows for easy storage of the hose cartridge between jobs. It also prevents dye leakage or contamination. Torque from the Big-EZ™ assembly easily overcomes AC&R system pressure, even with R-410A.
