

Corzano, October 20, 2021

Dear customer,

With regard to your JetGun purchase, please take into consideration the following to ensure proper maintenance of the product.

After using JetGun with cleaners it is necessary to rinse the internal circuit with tap water to avoid damaging the pump's components. Fill the H2O bag with tap water and dispense a few litres to ensure complete cleaning.

ERRECOM SPA will not be held responsible for malfunctions and/or other consequences arising from failure to comply with this procedure.

Please do not hesitate to contact us for any further information,

Best regards

ERRECOM SPA
